

Keeping a watch around the clock on your computers

RAMSAC, an IT solutions consultancy based in Godalming has launched a product to deliver round-the-clock monitoring of business critical systems.

With a secure link to the network, the Ramsac Server Guard automatically completes a scan of the client's servers every 15 minutes, reporting any issues to the Ramsac helpdesk team, enabling it to resolve poten-

tial issues before clients notice any problems. Server Guard is the latest addition to Ramsac's range of remote helpdesk support services that ensure the mission critical systems of SME's remain fully operational for longer.

It adds to an already well-proven support offering that provide clients with affordable, reliable, proactive and non-invasive support for their systems.
