The rise of the video meeting

Whatever happens over the coming months, the sudden rise in remote working has caused many people to rethink the way they want to work when we eventually return to business as usual. A taboo of meeting with clients via video that still existed in some organisations, has been smashed, and with so many people enjoying less time on trains and motorways and we can all agree that the video meeting is here to stay.

When lockdown restrictions are finally lifted, it is unlikely that all staff will return to the office. Social distancing in some form is likely to continue for many months after lockdown, so it's inevitable that with some colleagues being in the office and others still at home, organisations will need to think about how easy it is for both remote workers, and those in meeting rooms, to quickly access that Teams or Zoom video call.

Using your laptop's camera and speaker for Teams and Zoom calls has been fine whilst we've been sat alone at home, but when colleagues are back in an open plan office, that simply will not work. If several colleagues use a meeting room to connect with external callers, social distancing means that they can't just all huddle around one laptop screen.

We've looked at various scenarios where a user will need the right tool for the job, from home workers to office teams, and considered the costs associated with making sure everyone is set up for efficient and stress free communication and collaboration.

Products listed from left to right

1. Logitech H390 headset 2. Logitech personal video collaboration kit 3. Logitech ConferenceCam connect 4. Logitech Meet Up 5. Logitech MeetUp solution for Teams 6. The Logitech Meet Up large bundle

Personal kit for a laptop user who has a built in webcam

Users require a reasonable quality headset so that meetings in the open plan office don't disturb the whole team.

We suggest the H390 headset from Logitech.

£28.50

Personal kit for a PC user

The Logitech personal video collaboration kit is a perfect bundle for PC users that don't have an in-built webcam. The headset will keep meetings confidential and the high quality web can will add video streaming.

You need to have two spare USB ports on your PC or MAC.

£205

Huddle space

The Logitech ConferenceCam connect is a portable all in one solution perfect for meetings of 1-6 people, with a wide angle camera, a rechargeable battery and is compatible with most video platforms.

£363

Small Meeting room

The Logitech Meet Up is an all in one, wide angle camera, microphone and speaker unit, a neat solution to connect to an existing meeting room PC, perfect for small meeting rooms.

£821

Small Meeting room

When some staff are based in the office, calling out to external contacts or home workers, you don't really want to all be huddling around a shared machine and the 2m rule will still apply.

For meeting rooms that already have a TV installed, consider the Logitech MeetUp solution for Teams, which includes everything you need to build out conference rooms with one or two displays.

The 'Small' bundle comes pre-configured with a Microsoft-approved i7 mini PC, Windows 10 IOT Enterprise, a PC mount with cable retention, Logitech Tap touch controller – which is a smart touchscreen table top device for simply setting up and joining Teams meetings, a Logitech Strong USB 10m cable, and the Logitech MeetUp – powerful multidirectional webcam and speaker solution.

This is a great system that doesn't require the users to bring any IT kid into the meeting room and the touchscreen interface is easy to wipe clean in between use.

£3497

Including installation (Display screen & cabling not included).

Large Meeting room

For larger meeting rooms, expand your Logitech Tap solution to include additional speakers, mic extensions (additional microphones for along the meeting table for better sound quality).

The 'Large' bundle comes pre-configured with a Microsoft-approved i7 mini PC, Windows 10 IOT Enterprise, a PC mount with cable retention, Logitech Tap touch controller, Logitech Strong USB 10m cable, Logitech Rally Plus (conference camera, 2 x speakers, 2 x mic-pods), Logitech Rally Mic Pod Hub, and a Logitech Rally mounting kit.

£5887

Including installation (Display screen & cabling not included)

Prices correct at time of going to print, subject to change and stock availability and exclude VAT & delivery.
